

# What to know

## About Fentanyl

### Fentanyl is an synthetic opioid

- 1** Fentanyl is 50 times stronger than heroin.  
Fentanyl can come in a white, gray, or tan powder form that can be injected, smoked, or snorted.
- 2** Fentanyl has been found in other drugs like, heroin, meth, cocaine, and pressed pills.
- 3** Fentanyl is NOT naloxone resistant. It is an opioid and will respond to naloxone.
- 4** You CANNOT overdose on Fentanyl from just touching it.
